EDUCATION

Karpagam Academy of Higher Education
B. Tech Artificial Intelligence & Data Science

2023-2027

WORK EXPERIENCE

Stepping Edge — AI Intern | Jun 2024 – Dec 2025

- Built web scraping pipelines to extract structured data from websites and APIs, supporting knowledge graph-style data organization.
- Implemented website summarization workflows using LangChain to convert unstructured content into concise, usable insights.

GeeksforGeeks — Technical Head | Jun 2025 – Present

- Independently conducted hands-on workshops on Python and Data Science, guiding students through practical concepts and real-world use cases.
- Led and organized a 2-day intra-college hackathon and mentored students on projects and technology career paths.

PROJECTS

Agentic Company Intelligence System [Python, LangChain, Llama 3 (Offline LLM) • Web Scraping] [Code](#)

- Built an agentic AI system to crawl company websites and B2B datasets, extracting and structuring company and people information at scale.
- Implemented web scraping and offline LLM orchestration to generate clean company profiles, automated QA reports, and actionable insights

Rural AI Assistant [Python • Offline LLM • Voice Interfaces • Local Storage] [Code](#)

- Designed and developed an offline-first AI assistant enabling voice-based interactions for stock tracking, sales logging, and basic insights
- Implemented intent extraction and local data handling to support reliable operation in low-connectivity environments

Satellite-Based Air Quality Downscaling [Python • Random Forest • CNN • Satellite Data (.nc)] [Code](#)

- Developed ML models to convert low-resolution satellite pollution data into high-resolution local air quality maps using Random Forest and CNNs
- Improved data gap-filling and spatial resolution, achieving high validation accuracy (>90%) on complex satellite datasets

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** IBM Data Science Professional Certificate, Microsoft Azure AI Essentials
- **Technologies:** Python, Java, SQL, JavaScript, Scikit-learn, TensorFlow/Keras, NumPy, Pandas, LangChain
- **Skills:** Machine Learning, NLP, Data Preprocessing & EDA, Web Scraping & Data Extraction, API Integration, LLM Orchestration Basics, Intent Handling & Prompt Design

ACHIEVEMENTS

- **Winner – InFynd AIM 2025 Hackathon** (AI & B2B Data Intelligence Solutions)
- **Finalist – Smart India Hackathon 2024** (ISRO Problem Statement)
- **Finalist – Rakathon 2024** (Rakuten India)
